PROJECTS

Movie Recommendation System

In this project, I utilized my skills in machine learning to design and implement a Content-Based Movie Recommendation System. The system enhances user experience by providing personalized movie suggestions based on individual user preferences and characteristics. The primary goal was to improve the discovery process for users by tailoring recommendations to their unique tastes and interests.

E-Commerce Dashboard

I have created a business dashboard in Power BI which allows to analyse and visualise the data easily. It contains an overview page, sales page, product page, employee page, drillthrough page some hidden slicers and tooltip.
